

Streamline ESG compliance

Solidatus serves data-rich and highly regulated companies by providing an organization-wide connected governance solution that goes beyond traditional data management offerings. Our unique approach integrates ESG principles, company priorities, assessment methodologies, and data sources with data flows, processes, and owners in a managed and shareable environment. This results in improved governance, reduced waste, increased efficiency, and enhanced socialization of ESG programs.

Regulatory data blueprint

With a blueprint of your data landscape, you can ensure transparency, adaptability, and scalability in response to new regulations and organizational changes.

Maintain a dynamic map of ESG initiatives, avoiding reactionary responses to new regulations that can disrupt daily operations. Our advanced integration capabilities link metrics to data flows within your company, enabling you to leverage existing data and plan for additional sources. This results in a live map of ESG initiatives, showcasing the translation of ESG goals into actual delivery.

Compliance control center

Experts and owners of parts of the data landscape can contribute collaboratively, with all changes versioned for full change management and comparison. Develop a compliance roadmap using as-is, as-was, and to-be views of your data landscape to easily evaluate the impact of changes on systems, policies, processes, and personnel, reducing assessment time from months to minutes.

Total transparency

Deliver digitized, immutable evidence of compliance with reporting obligations, reducing manual effort and resource costs involved in preparing for examinations. Present relevant perspectives of your data environment and create persona-specific views for executive decisionmakers, board members and regulators, demonstrating that critical data and underlying sources are well-known and controlled.

We'd love to hear your data challenges and show you how Solidatus can help. For a personalized consultation and demo, visit solidatus.com or email us at hello@solidatus.com
